

Branch selector

The branch selector allow users to select the branch they want to use within our iamproperty products. This component is accompanied by the dialog popover menu if 9 or less branches are available or the dialog popover with search is 10 or more branches and appears upon the user clicking the branch select 'Active' state.

It will be situated within the secondary menu navigation on desktop and in the 'my account' side menu of the mobile and tablet views. All branch selector variants will truncate after 32 characters at default view, they will show '...' after 32 characters, upon hover it will reveal the full branch name in a browser default tooltip. The full branch name will be shown in the dialog popover menu.

Counter included

The counter is an optional addition to the branch selector component and is used to highlight the amount of branches available to the user without having to click into the active state to reveal the number of branches.
